

A QIK Refresh – What's New

We have some exciting developments to be released early October to enhance your lending processes. Your Training Manual will be updated and sent out in due course. These changes include

- ✓ Wheels report enhancements
- ✓ Enhanced ID verification

1. Wheels Report Enhancement

The Wheels report will automatically match the vehicle model so that you do not have to select the correct model from the Variant drop list. Just click on the Continue button for the vehicle information to be populated in the Application form. You will still need to enter the Insured Value before you continue.

Don't forget to review the summary of warnings reported as Finance Now will require confirmation these have been updated and communicated to the customer.

Remember to record any additional information relating to the vehicle in the Lender Notes at the bottom of the Asset & Liabilities screen.

Wheels Report (#1488966)
VIN (7A5AAASAPLRA68625) / Plate Number (BAZ832)

2. Enhanced Electronic ID verification

With the introduction of the AMLCFT legislation increased compliance obligations are required in relation to "knowing your customer". We are taking steps to increase our electronic checking to assist compliance in this area. Qik will now be completing the following checks on all customers, subject to the ID type used.

Drivers Licence electronic verification & type checking

New Zealand Passport electronic verification

Consumer address matching (all customers)
